

Phoenix Leader Education Program (Hiroshima Initiative)
for Renaissance from Radiation Disaster

The 3rd & 4th short-term internship report meeting was held.

The Phoenix Leader Education Program held two short-term internship report meetings.

At the 3rd short-term internship report meeting (13 June 2014), one of the program students who completed his internship at Minamisoma city general hospital gave his presentation. He was assigned to the hospital's rehabilitation section. In his presentation using data and visuals, he explained his activities at the neighboring temporary housing complexes. He also spoke about the current physical status of the people affected by the disaster.

At the 4th short-term internship report meeting (28 July 2014), one of the program students who completed his internship at Chiyoda Technol Corporation gave his presentation. In his presentation he talked about the calibration of radiation counters and the principle of personal dosimeters. He concluded his presentation with a question and answer session about the principles of radiation medical equipment.

These report meetings were televised to both Higashihiroshima and Kasumi campus as well as to several collaborating organizations. The presentations and the discussions were conducted in English.
